

A Service Provided by the
CALIFORNIA HOMEBUILDING FOUNDATION

CIRB History

Since 1954, CIRB (Construction Industry Research Board) has been California's premier statistical resource for residential and commercial building permit data.

The California Homebuilding Foundation (CHF) acquired the CIRB Report from the Building Industry Association of Southern California (BIASC) and research director, Ben Bartolotto, in 2012.

Located at the CHF and CBIA headquarters in Sacramento, CIRB distributes its signature monthly publication, the *California Construction Review* (CCR), in addition to innovating new data formats and reports.
